

Benny Burshtein

Benny Burshtein is an Energy Efficiency Engineer for EnergyClimate Solutions. He has eight years of experience in engineering, marketing and manufacturing for companies in the US and Europe. After military service, he worked in manufacturing companies for several years, where he discovered an aptitude for improving efficiency in complex machinery and streamlining manufacturing processes. His research during college led him to believe that the world cannot continue without sustainable energy solutions, and he shifted the focus of his degree to concentrate on renewable resources, with emphasis on solar energy.

Mr. Burshtein managed a team of 15 associates at GPMI Company, located in Arizona, a leader in consumer goods manufacturing, and established new procedures for improving quality and efficiency of production. At Layish Engineering in Israel, he assembled, installed and tested converting machinery and provided quality control. Key responsibilities at Formaster SA included conducting market research and developing business plans for the launch of products in the US. He especially enjoys the design and creation of manufacturing processes and the trouble-shooting and tweaking of machinery.

Mr. Burshtein graduated from the University of Massachusetts with a BSc degree in Mechanical Engineering with a minor in Solar Energy Systems Design. He is fluent in English and Hebrew and is conversational in Russian. Benny enjoys sports, including soccer, basketball and tennis.
