

David S. Dayton

Dave Dayton is a member of the EnergyClimate Solutions Board of Directors and a Senior Technical Advisor to the company. He is Chief Executive Officer of Clean Energy Solutions, Inc., a company he formed in 2000 to advise municipalities, utilities, government agencies, housing organizations and financial organizations on energy efficiency program design and its integration with renewable technologies. At the request of the City of Cambridge and the Henry P. Kendall Foundation, Mr. Dayton designed the financing, organizational, and technical architecture of the Cambridge Energy Alliance, including its interface with ISO-NE and NSTAR, and advocated for its endorsement by all key stakeholders. The Cambridge Energy Alliance is a city-sponsored non-profit organization that is creating a groundbreaking program to significantly reduce energy and water use in Cambridge, MA.

In 1982, Mr. Dayton founded Select Energy Services, Inc. (SESI; formerly HEC Inc.) and served as chairman until its acquisition by Northeast Utilities in 1990. As Founder and Director from 1990 until his retirement in 2002, Dave led the company's acquisition program and its development of new energy services in new markets. SESI recommended and installed (and often financed) over a billion dollars worth of energy-efficiency improvements in some of the country's leading institutional, government, and commercial facilities. Mr. Dayton served as President of Energía Global International Ltd., for two years and on its Board for ten years, leading up to its acquisition by ENEL, the world's largest publicly-traded electric utility. In 1968, Mr. Dayton founded the non-profit Technical Development Corporation (TDC) of Boston, and served as its President until 1982. During that period, TDC performed many innovative projects in energy conservation, criminal justice and job creation, and set up a number of other corporations in its fields of interest.

Prior to his work in energy services, Mr. Dayton was a co-founder and technical director of the Technical Communications Corporation, where he led advances in the application of new broadband modulation techniques to radio communication and navigation. He began his career as a Section Leader in the Missile Systems Division of the Raytheon Company and was subsequently promoted to Raytheon's Corporate Staff.

Mr. Dayton has also been the chairman or president of many public policy, health, cultural, and community organizations in Massachusetts, and has received several appointments by past governors to advisory boards and state councils. He served on the board of the Dimock Community Health Center in Roxbury, MA and for several years on the Executive Committee of the International Performance Measurement and Verification Protocol. He was appointed to the Massachusetts Technology Collaborative's Renewable Industry Support Advisory Committee in 2002, and was subsequently engaged as a senior consultant to the Renewable Energy Trust. Mr. Dayton has spoken and published widely on energy efficiency and was on the Energy Task Force of the President's Commission on Environmental Quality. He served two years as President of the National Association of

Energy Service Companies, and is considered by many to be a leader in the evolution of the energy services industry.

Mr. Dayton received a B.S.E.E. from Worcester Polytechnic Institute and an M.B.A. from the Kellogg School, Northwestern University.
